

A conference on water technologies and Cyber-Physical Systems

05th – 08th June 2023

Department of Chemical Engineering
Indian Institute of Technology, Ropar, Punjab

Sponsored by AWaDH

Conference Theme

Water quality is impacted by increasing urbanization, population growth, economic growth, and massive changes in environmental conditions. One of the biggest threats to the sustainability and availability of freshwater is the deterioration of water quality. IIT Ropar and AWADH are cosponsoring this first International Conference on Water Technologies and Cyber-Physical Systems; to provide a unique international forum to exchange scientific knowledge and experiences and present new findings to integrated water technologies and cyber-physical systems. The conference aims to facilitate networking opportunities between scientists, managers, engineers, and stakeholders on challenges and solutions to water-based technologies.

Target Audience

- Advanced oxidation technologies in water treatment.
- Membrane, Membrane reactor operations in chemical engineering, membrane distillation, and wastewater treatment.
- Nanomaterials in water treatment applications.
- Environment chemistry and water treatment.
- Medical water treatment technologies and solutions.
- IoT and Cyber-Physical Systems.

Contact details

Important Dates

Paper Abstract Submission	20/02/2023
Paper Abstract Acceptance	10/03/2023
Final Paper and Presentation Submission	20/03/2023
Registration	30/03/2023

Registrations

Category	Early bird registration (INR)	Late registration (INR)
Research Scholars (including international participants)	4500	6500
Faculty and Industrial employees (including international participants)	8000	10000

Registration Portal
